Programme 'will boost SA'

Sinesipho Schrieber

The National African Federated Chamber of Commerce and Industry (Nafcoc) is waiting for accreditation from the University of South Africa (Unisa) for a newly-designed entrepreneurship programme for grade one to seven pupils.

Nafcoc acting President Gilbert Mosena said early financial literacy for children was important and would boost the economy. He said their programme was designed to instill an entrepreneurial mind-set in children.

"Prioritisation of children to understand business and be business minded would see the country's economy boosted.

"The country's inherited education from the apartheid government does not equip learners with enough entrepreneurship skills.

"The study of economics is foreign to them and that needs to be addressed," said Mosena.

He said many children grew up with the employee mind-set and not entrepreneurship which had led to slow growth in economy.

Meet our Nafcoc Council Members: in full capacity after a hectic day of the strategic planning of the year 2019. A highest decision-making body where the special resolutions are taken.

KZN the 15th October 2019 was a great success even though there is still a lot, that needs to be done on a membership drive in all districts.

The deputy chairperson of KZN: Mr Enoch Chisane, shared a brief and the richest historical background of KZN as a tourist's attraction and destination, such as the Nelson Mandela memorial capture in Howick. Also have the underground minerals such as coal, wildlife, vegetation, fishing and farming along the coastal region.
